Atos

*Il digitale è come l'elettricità:
è un «abilitatore» invisibile che consente di dar vita a prodotti, servizi ed esperienze
che in alcuni casi si integrano con quelli precedenti,
in altri li sostituiscono tout court.*

(P Kotler, G Stigliano. Retail 4.0: 10 regole per l'Era digitale. Milano, 2018)

Il digitale abilita nuovi comportamenti

Dovunque, in qualsiasi momento, in modo diverso, più facile, più veloce, più sicuro.....

84%
degli utenti provvisti di
smartphone
utilizzano il loro telefono in
negozi

retailtouchpoints.com

80%
degli utenti afferma che
l'esperienza che
un'azienda fornisce è
importante quanto il
prodotto e i servizi

Multicanalità Vs Omnicanalità

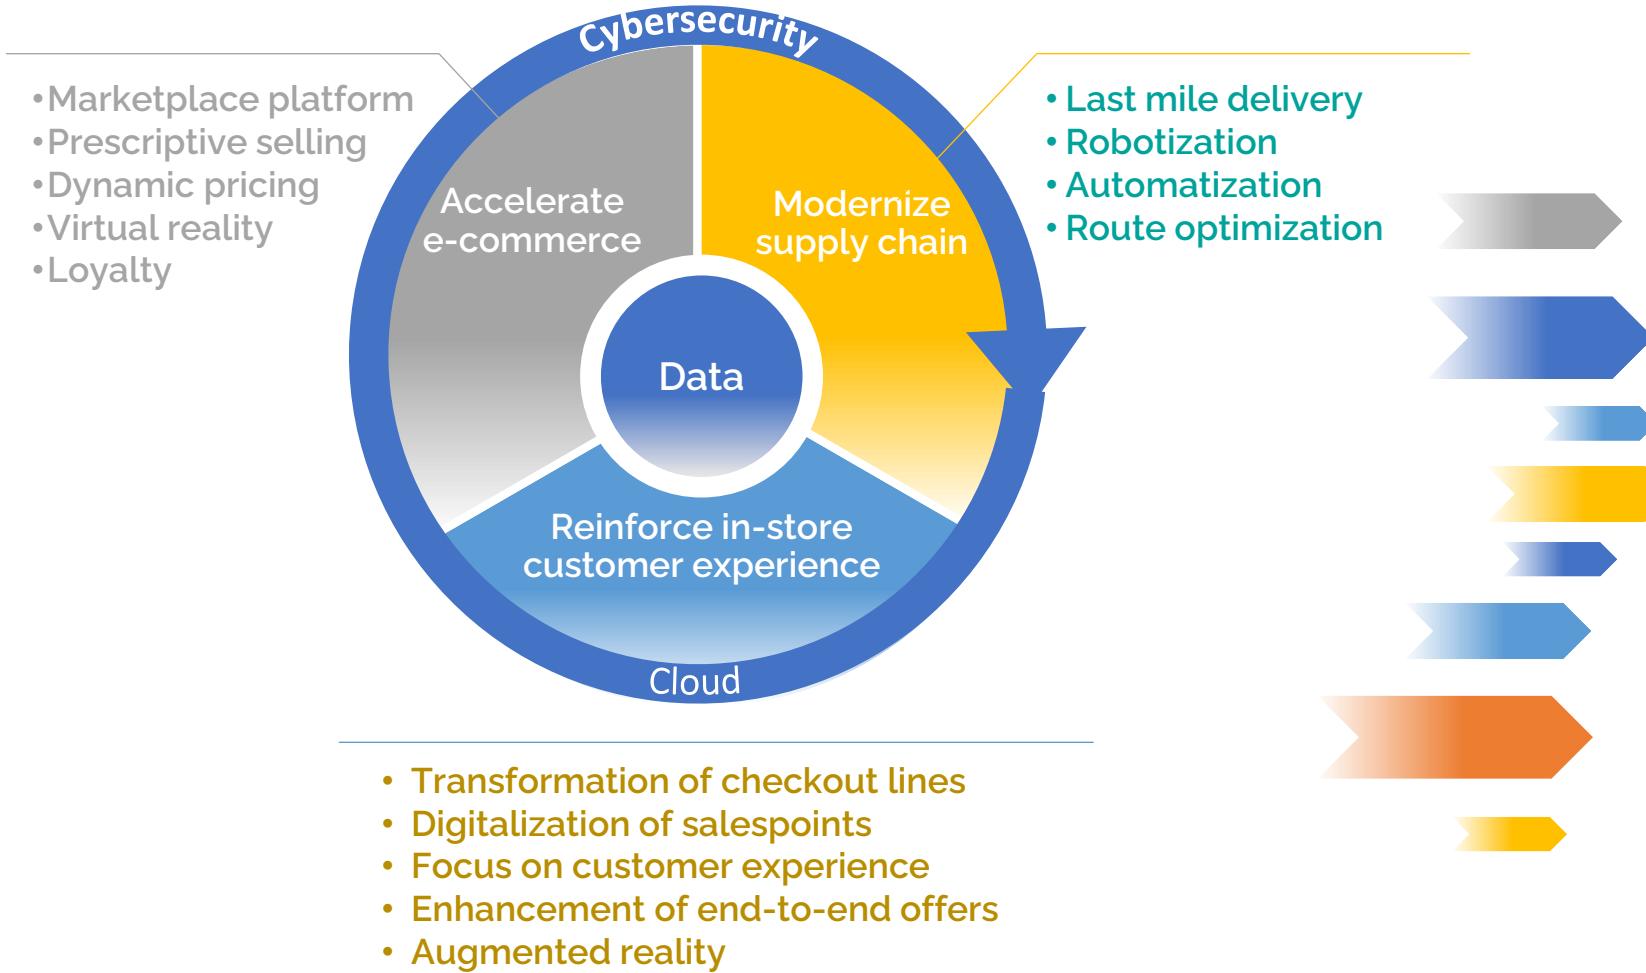

Strategia multicanale

- varietà di canali: la customer journey consente interazioni e transazioni fra il brand e il cliente per canale.
- Governo del consumatore lungo un customer journey “ideale” dal punto di vista dell’azienda.
- Carenza di interconnessione tra i canali nella customer journey
- I canali sono gestiti separatamente con propri obiettivi e indicatori di performance (KPI)

Strategia omnicanale

- Visione unificata dei diversi canali in modo unificato
- Visione universale, “olistica” della customer experience e dei relativi touchpoint.
- L’obiettivo non è più generare transazioni, ma sviluppare un’esperienza senza soluzione di continuità attraverso tutti i canali disponibili
- i touchpoint consentono relazioni non solo con un elemento della marca, ma con la marca nel suo complesso. E si rinforzano a vicenda con coerenza.

Digitale → più affari Piattaforme → pieno potenziale

Atos designed business platforms answer a complex equation

Business imperatives

Costs control & predictability

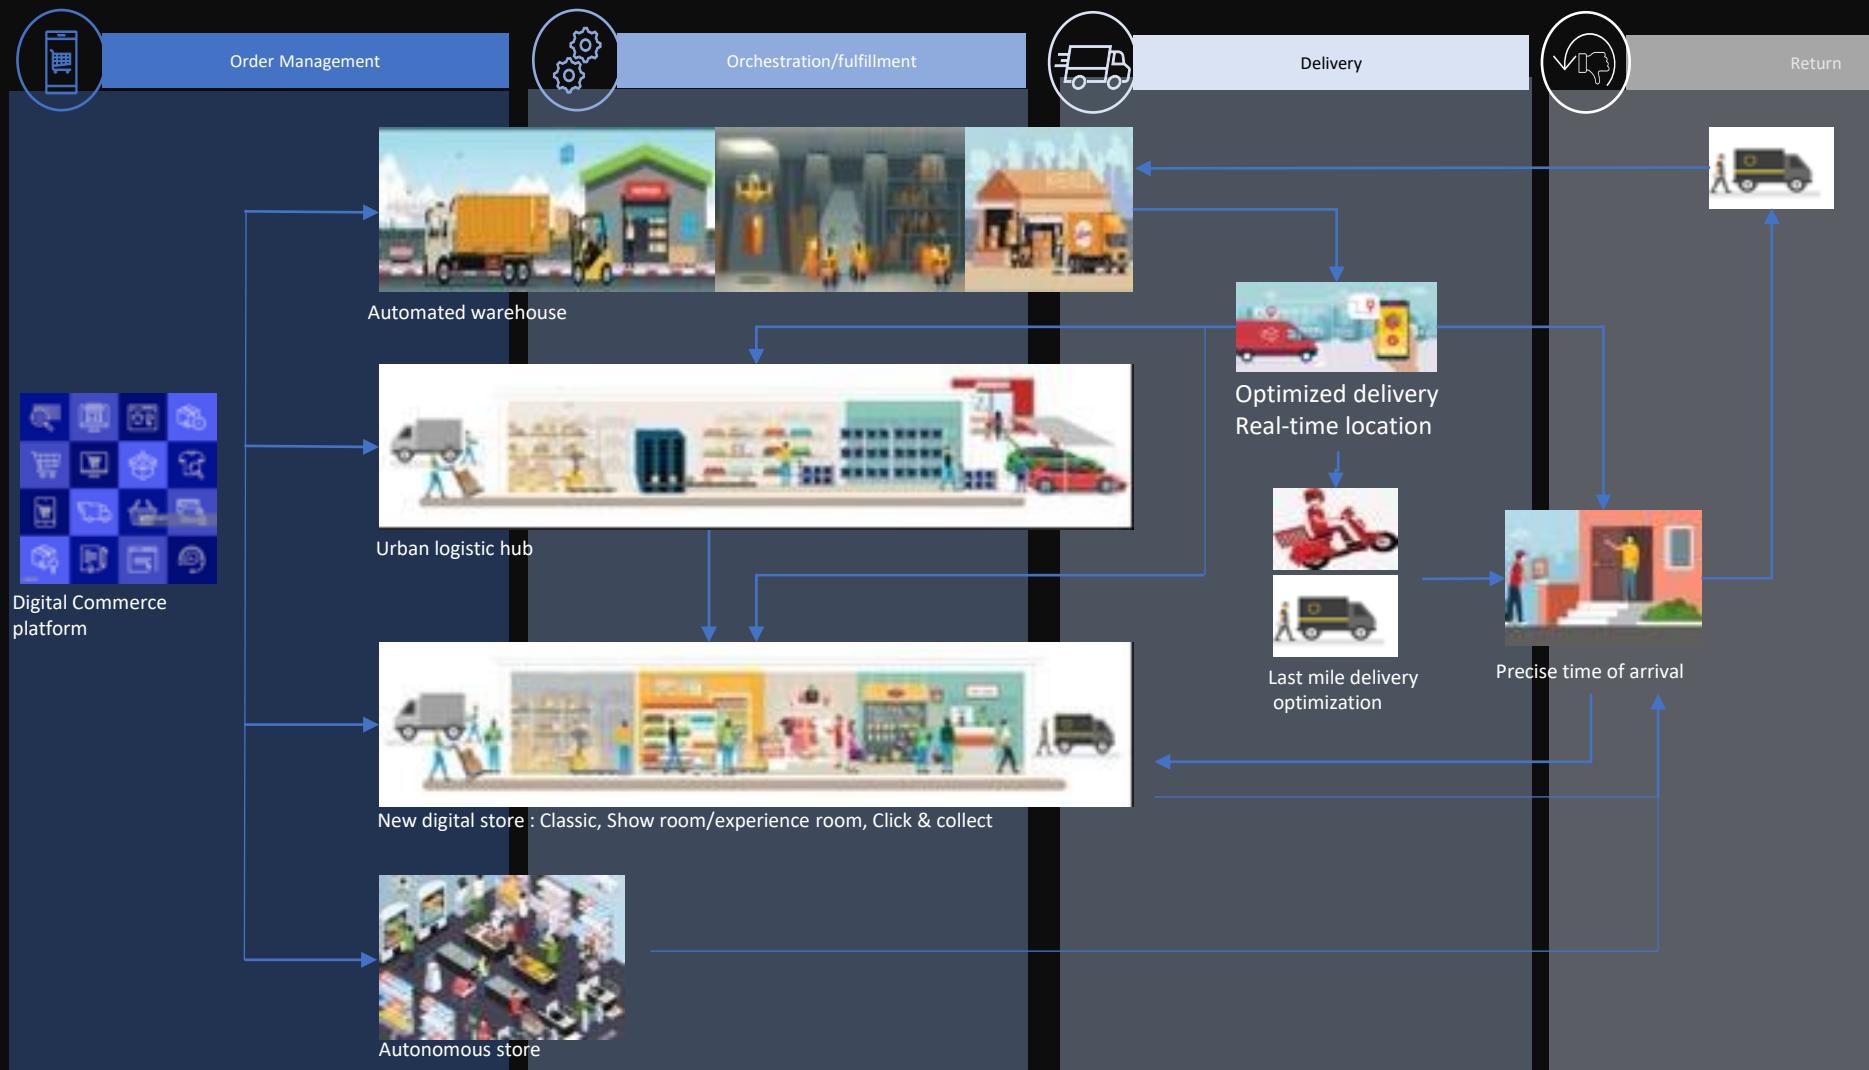

Risks

Carbon footprint

Undepinned by cloud, data, cybersecurity technologies

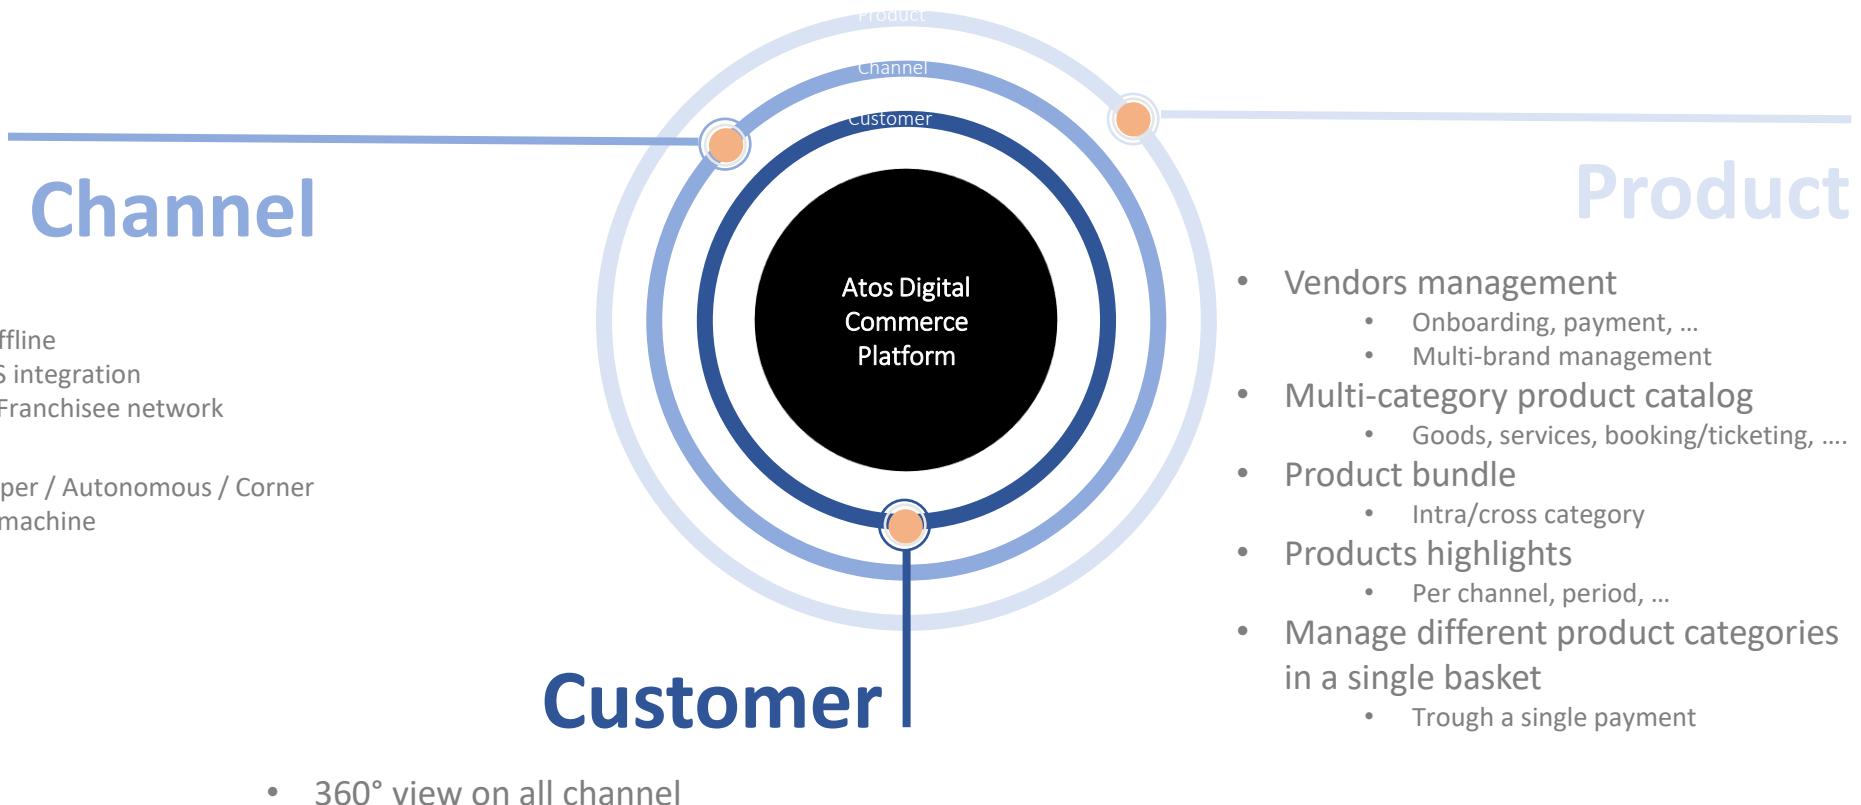

Omnicanalità una nuova sfida

- Real-time view of omnicanal stocks
- Wide choice of delivery / picking
- Same day delivery
- Return optimization

Una piattaforma per una visione aggregata

semplifica processo acquisto

Vuoi pagare?
Non c'è più bisogno di attendere!

A woman with long dark hair tied back in a ponytail is seen from behind, standing in a grocery store aisle. She is wearing a light blue denim jacket over a white shirt and has a brown strap across her shoulder. In front of her are several well-stocked shelves filled with various grocery items like cereals, snacks, and packaged goods.

**Sei riuscito a trovare tutto?
Gli scaffali sono riforniti con ciò di cui hai bisogno!**

Il tuo assortimento vende realmente?
Comprendi ciò che il cliente realmente vuole!

La digitalizzazione porta verso l'autonomous store

Cosa rende un negozio realmente autonomo?

Retailers automate store functions to improve **store performance** and **customer experience**

- **Identification gives access**, opens a virtual shopping basket and allows seamless check-out
- **Items and their place** are monitored and recognized
- **Customers are tracked** through the store (security, store intelligence)
- **Customer's virtual shopping basket** – always updated
- **Automized out of shelf detection** and more
- **Automated payment** with a receipt sent to the customer's email/app/account

Consumers **enter** the store (24/7), **take** their items, and **leave** the store **without delays**

- **Customers enter** the store via check-in system
- **Customer picks up** an item and takes it – it will be added to the bill
- **Goods** that are **put down again** are not counted for the bill
- **No need to stand in a queue** for payment
- **Self check out / automated check-out** of the shopping basket content
- **Automated payment** - the customer gets a receipt

Digitalizzazione punto vendita

migliore esperienza cliente / dipendenti

Customer experience

Connected shopping cart

- Collection of new customer data
- Personalized interaction
- Customer journey in the store (geolocation)
- Deported checkout

Mobile Check out

- Customer experience (autonomy)
- Autonomous store
- Customer loyalty

Self check out

- Shopping cart / basket
- Fluidity of the check out
- Time range

In-store customer engagement

- Customer recognition
- Personalized interaction
- Connected label

Connected scale

- Markdown Management
- Fraud

Pick up

- Cross sell

Employee experience

Energy management

- Optimization / reduction / control of cost items

Staff management

- Optimization of personnel management in stores
- Workforce management

Maintenance Prédictive

- IoT
- Edge computing
- IA

Management of store operations

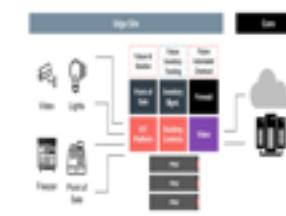

- BBD management
- Customer advice/interaction
- Optimization of the employee path in store

Inventory management

- Replenishment of shelves
- Avoiding stock-outs
- Permanent inventory

Store virtualization

- Edge computing
- Virtualization solution

Control and availability of the data

Agilità, ROI, bassi investimenti, vantaggi aziendali

Security

Flexible environment

Costs reduction and predictability

Decarbonization

Low or No Capex required

Digital Hub for Retail

Aggregation : stores channel & networks (sales, stocks, customer knowledge & history, formats)

Store Digitalization

Eases store operations
Improves customer engagement
Decrease store operating costs (Reduce them in a range of -18% to -38%)

Warehouse automation

>30% Increase in Order Volume
>90% Reduction in Truck Unload Time
35% Smaller Footprint
3x Increase in Capacity
>70% Reduction of direct labor

Decarbonization

Offsetting
Decarbonization Levels Agreement

Progetto Atos in corso
Autonomous store
(Aeroporto di Brussels)

- 60 m² in-site store
- Goods (food/non food) and gift
- Opening plan last quarter of 2022

La piattaforme interconnesse arricchiscono l'esperienza dei clienti

Destination Marketing Organisation

Atos Digital hub implemented to improve the guest experience

- More than 2000 sub-sellers available on the platform
- Go live by the end of 2021

Client's challenge

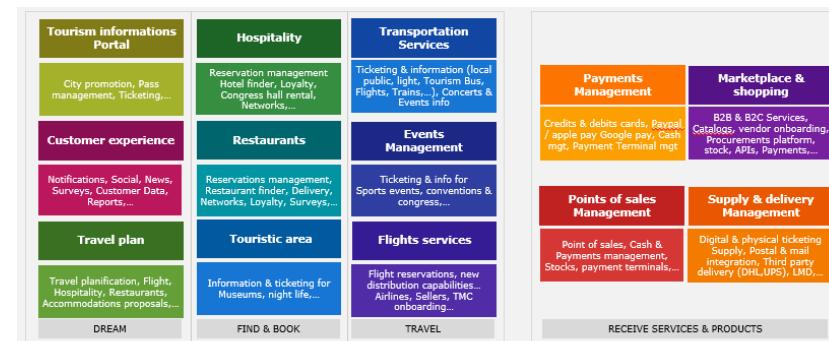

Atos solution

Business benefits

- The Convention and Visitors Bureau promotes the destination in the Country and abroad for corporate customers and end visitors.
- The COVID 19 highly impacts tourist frequentation (-75%) and therefore inevitably on tourism professionals.
- Driven by its public service mission, in this crisis context, the Convention and Visitors Bureau needs a new digital platform to efficiently serve its visitors with wide range of partners

- CRM module for **Client knowledge**
 - Customer data aggregation
 - Acquisition, and loyalty campaigns
 - Content customization
- Marketplace opened to multiple partners, offering a package with a homogeneous customer journey in a single basket
 - payment, ticketing, accommodation, transport, e-commerce, insurance services...

- Interconnected services to simplify and enrich customer journeys
- City tourism marketplace dedicated to prepare for the exit of Covid, in smart coordination of next major sporting events in 2023 and 2024.
- New incomes sources of the Tourism office as well as its new members,
- Know customers better, their expectations and consumption patterns to better use data.
- PCVB members can develop with enhanced visibility their income with such merchant space to market their offers (ticketing, e-commerce, services)
