Title	Policy and Innovation for social impact
Theme	<p>Health, poverty, equality, environment, education are all issues which are posing challenges to government all over the world and eventually attracting the attention of corporation. Yet achieving a true social impact entails revising the reference paradigm for public and private organizations in all phases of their value chain, facing a gap in current theoretical contribution. This research theme encompasses a number of sub-issues as for example:</p> <ul style="list-style-type: none">• How is it possible to measure social impact?• Are social impact finance instruments effective and how• How building a social innovation ecosystem?• How designing public policy with a social impact perspective?• How measuring and managing risks?• Are new organizational paradigms needed in order to achieve social impact?• Which lessons can be drawn from successful social innovations?
