

INFORMATION ON THE PREVENTION AND PROTECTION MEASURES TAKEN BY MIP TO COMBAT AND CONTAIN THE SPREAD OF COVID-19

ENTERING MIP'S BUILDINGS

The following conditions apply to ALL students, staff, visitors and any other persons wishing to enter MIP's buildings:

- You must not have any respiratory symptoms and your body temperature must not be above 37.5°C / 99.5°F, including over the past three days.
- You must not have been in quarantine or in self-isolation over the past 14 days.
- You must not have been in contact with anyone who is Covid-19 positive, as far as you know, in the past 14 days.

If you have respiratory symptoms or your body temperature is above 37.5°C / 99.5°F, you must stay at home. Body temperature screening is not currently a legal requirement, and you are responsible for checking your own state of health.

If, when teaching resumes, changes to legislation at regional level require us to measure your temperature before you can enter our buildings, we will inform you promptly.

Italian Legislative Decree no. 111 of 6 August 2021, published in the Official Gazette on 07/08/2021 ("*Urgent measures enabling the safe operation of school, university, social and transport services*") introduced, within Legislative Decree no. 52 of 22 April 2021 ("*Urgent measures for the gradual resumption of social and economic activities, observing the need to contain the spread of the Covid-19 pandemic*"), Article 9-ter, which sets out the measures to prevent infection from SARS-CoV-2 in institutions belonging to the national education system and universities, in view of the start of the next academic year, while bearing in mind the new context, the current epidemiological picture and the progress of the Italian vaccination plan. The regulation also applies to "other institutions of higher education connected to universities".

Under Legislative Decree no. 122 of 10 September 2021, until the 31st of December 2021 (the end of the state of emergency unless otherwise extended) **everyone** entering MIP premises must be in possession and exhibit a Covid-19 Green Certification ("Green Pass"), as per Article 9 paragraph 2 of Legislative Decree no. 52/2021, or a Certificate of Exemption from the vaccination. Checks will be carried out according to the modalities set out in the Prime Ministerial Decree of 17 June 2021 and subsequent amendments and integrations.

PERSONAL CARE

Personal hygiene is important:

- Wash your hands frequently, if possible with soap and water, otherwise use the sanitising gels located at various points around the building and near lecture rooms; clean your hands before entering.
- Avoid touching your eyes, nose and mouth.
- Avoid hugging and shaking hands.
- Cover your nose and mouth when sneezing or coughing.

SOCIAL DISTANCING

Among the measures taken by the School, the principle of social distancing is a priority. Therefore:

- **Keep a safety distance of at least one metre between yourself and everyone else in all lecture rooms, common areas and transit areas.**
- **Respect the maximum number of people allowed in the lecture rooms and other common areas**, as per the various warning signs, to maintain proper social distancing.
- **Respect the differentiated entry and exit flows in and out of lecture rooms**, by following the signs, to prevent crowding.
- **Access toilet facilities one at a time.**

PERSONAL PROTECTIVE EQUIPMENT - PPE

You must always wear a surgical face mask or face mask/cover at all times when you are in MIP's buildings. This rule applies to all teachers, students, classroom tutors, etc. Face masks/covers can be disposable or reusable, including homemade, in multilayer fabric and provide an adequate barrier while allowing you to breathe easily, and must cover your nose and mouth.

Obviously, there is the possibility that the Authorities could decide - when school terms start - that wearing a face mask or cover is no longer obligatory, in consideration of the epidemiological picture. MIP will make sure that it informs you promptly of any change.

CLEANLINESS AND VENTILATION IN CLOSED AREAS

MIP will ensure that all areas are kept clean and disinfected, using specialised external services, **with particular care given to the surfaces that are touched the most frequently, toilet facilities and common areas.** The cleaning service will use licenced cleaning products with anti-virus action, as indicated by the Italian National Institute of Health.

All rooms and areas will be well-aeriated with good air circulation, where possible using natural ventilation.

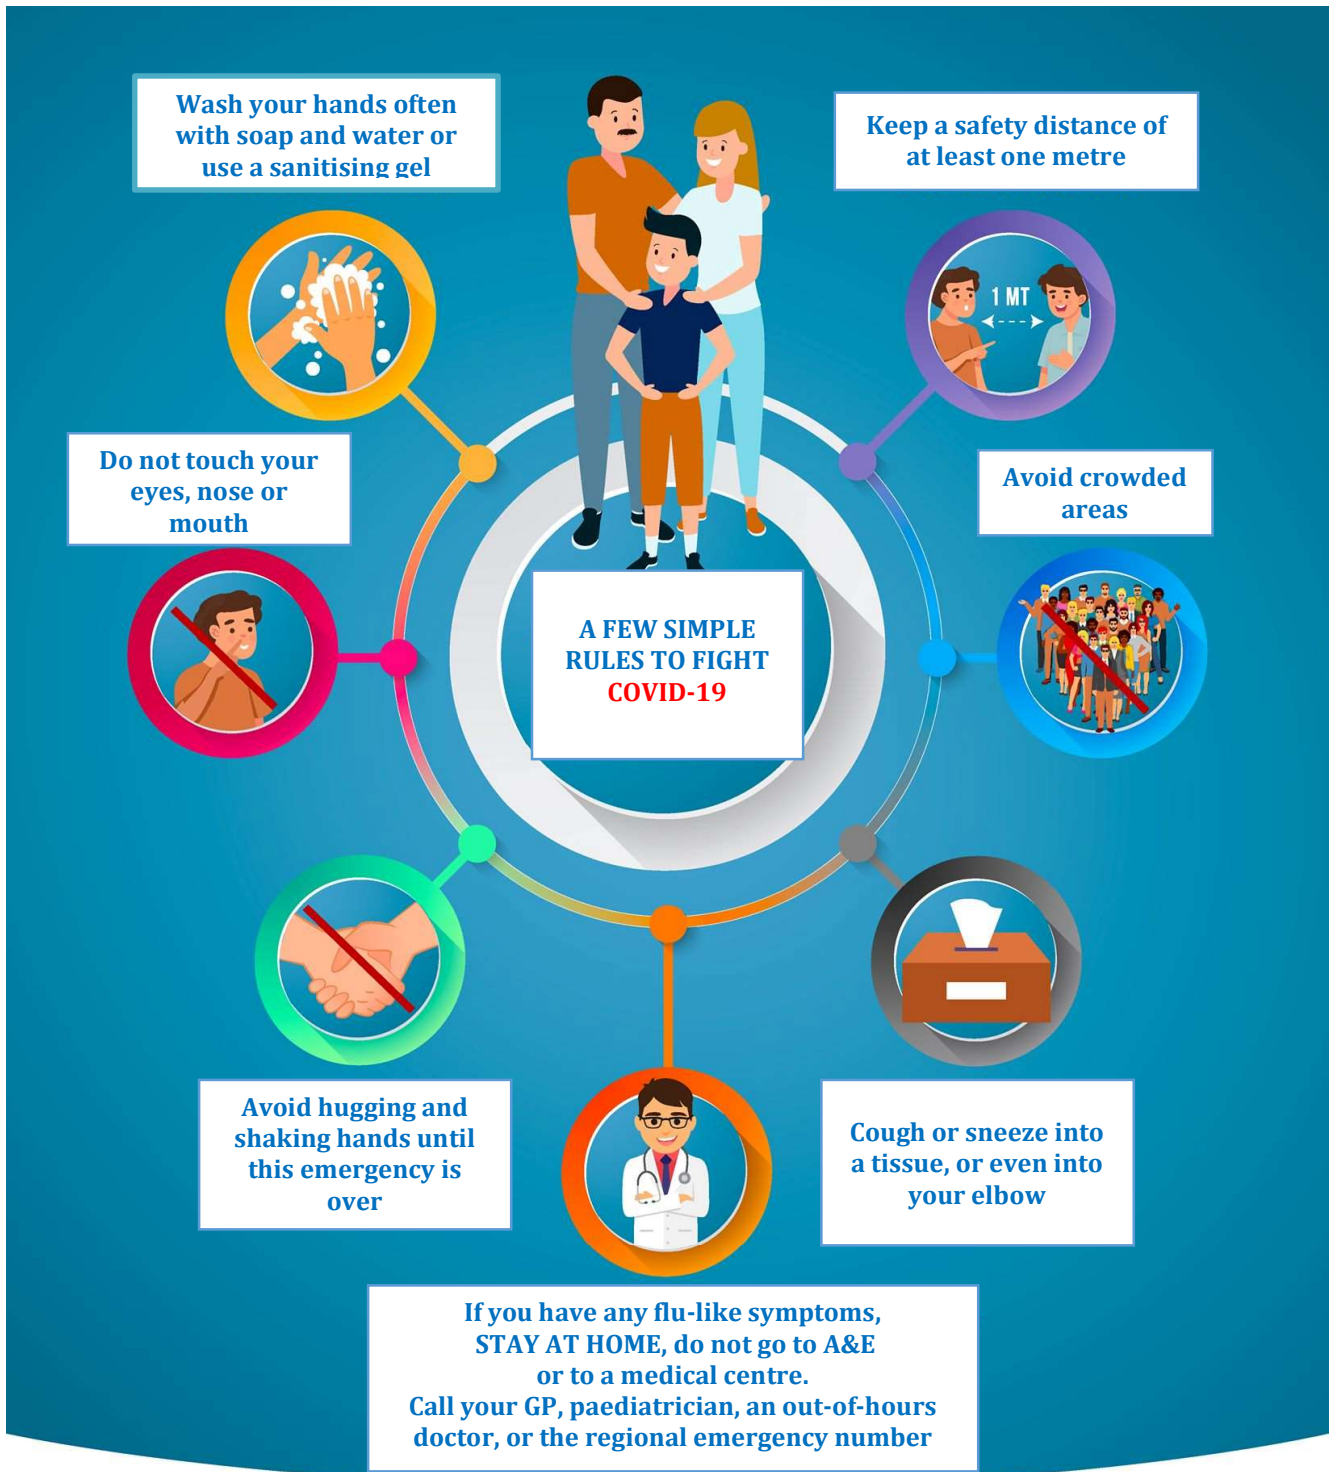

MANAGING A SYMPTOMATIC PERSON

If a student/teacher shows signs of Covid-19 (high temperature, respiratory symptoms, etc.) while at MIP, **they must be isolated immediately and given a surgical mask**, if they are not wearing one already. Arrangements will be made to send them home immediately, where they must follow all the rules currently in place for any suspected case of Covid-19.

When put in isolation, the symptomatic person will be placed in a room/area away from any other person, as long as they are sufficiently at ease.

The emergency number 112 should be called **ONLY IF** strictly necessary.

If you are confirmed to have Covid-19, you must follow the procedures set by the local health agencies for rules on quarantining and returning to the School. MIP will work with the competent health authorities to identify your "close contacts", so that the authorities can put in place the necessary and desirable quarantine measures.

WASH YOUR HANDS WITH SOAP AND WATER IF THEY LOOK DIRTY!

OTHERWISE USE A GEL

It should take 40 to 60 seconds

Wet your hands

Cover your hands with just enough soap

Rub your hands palm against palm

Right palm against the back of left hand, lacing your fingers and vice versa

Palm against palm, lacing your fingers

Back of fingers against opposite palm, with closed fingers

Rotate left thumb in right palm and vice versa

Rotate right-hand fingers in left palm, keeping fingers tight together, and vice versa

Rinse hands with water

Dry hands careful with a disposable towel

Turn the tap off with the towel

...dry hands, safe hands

Come frizionare le mani con la soluzione alcolica?

**USA LA SOLUZIONE ALCOLICA PER L'IGIENE DELLE MANI!
LAVALE CON ACQUA E SAPONE SOLTANTO SE VISIBILMENTE SPORCHE!**

Durata dell'intera procedura: **20-30 secondi**

Versare nel palmo della mano una quantità di soluzione sufficiente per coprire tutta la superficie delle mani.

frizionare le mani palmo contro palmo

il palmo destro sopra il dorso sinistro intrecciando le dita tra loro e viceversa

palmo contro palmo intrecciando le dita tra loro

dorso delle dita contro il palmo opposto tenendo le dita strette tra loro

frizione rotazionale del pollice sinistro stretto nel palmo destro e viceversa

frizione rotazionale, in avanti ed indietro con le dita della mano destra strette tra loro nel palmo sinistro e viceversa

...una volta asciutte, le tue mani sono sicure.
