graduation thesis

Title	The role of public sector in Social Impact Investing: a cross-country comparison
Language	English

Supervisor	Professor Mario Calderini
Thesis Summary	<p>The emerging relevance that Impact Investing market is acquiring at worldwide level and the gap present in the academic literature regarding the role of Public Sector in promoting, fostering and supporting this market, led to the development of this research.</p> <p>The objective is to answer to three different questions. First, how Public Sector can support the development of Social Impact Investing market. Second, thanks to case studies methodology, research detects the initiatives implemented by Public Sector for covering these roles and for supporting the development of the market. The collection of interviews and documents led to draft Italian and Portuguese case studies. Finally, we individualized reasons that led to possible misalignment between initiatives planned, or recognized as fundamental, and those actually implemented.</p> <p>This brought to some considerations related to the different roles and to the evident mismatch between demand and supply inside the market.</p>
