POLITECNICO
MILANO 1863

2017 - 2020 **Politecnico di Milano**
Master of Science - Automation Engineering -
Final grade: 110 out of 110 cum Laude
2014 - 2017 **Politecnico di Milano**
Bachelor's Degree - Automation Engineering

2009 - 2014 • Liceo Scientifico

'HOW' PART...

Next to my academic and job results, next to the logos of the organisations and universities that I had the pleasure of joining, i.e. my WHATs, I would give a resume of my HOWs.

My HOWs are the methods, the ways and the purposes I used to have while approaching a new challenge.

I like to discover and figure out the specific context, be aware of the framework, understand the direction to follow and the goal to achieve.

I need to learn about that. I am always conscious that I don't know enough. Hence, reading and listening are essential for me.

When I am enough aware of the framework and context, identifying patterns, opportunities and synergies is my favourite activity, always keeping in mind the bearings.

The study and design parts are the most stimulating ones for me.

I need to be creative, i.e. to create, literally, ideas, actions, models...

"Words and ideas can change the world". (professor John Keating in the movie 'Dead Poets Society')

LANGUAGES

Italian: mother-tongue

English: fluent

PUBLICATION

Part of my master thesis 'Posted Pricing with Time-Discounted Valuations and Poisson Arrivals' has become a paper at the **35th AAAI Conference on Artificial Intelligence - AAAI 2021**: 'Online Posted-Pricing with Unknown Time-Discounted Valuations' ([full paper with proofs](#))

AAAI is an A* Conference, the highest ranking

Corresponding to the flagship conferences, the ones that are the leading in that area of discipline

PROGAMMING LANGUAGES

I've written code in Python, C, R, Matlab; I've used optimization solver in Ampl, Data Manipulation tools like SQL, and Data Visualization tools like Tableau; I've designed simple software models in UML

WHERE I CAME FROM...

I was born in Alta Irpinia, Southern Italy
a beautiful land of history, food, people, landscapes and silence

MY HEROS...

Roger Federer, Massimo Bottura, Erri De Luca, Samwise Gamgee
the list is currently being updated

MY INTERESTS...

Digital Strategy, Artificial Intelligence,
Computational Economics, Machine Learning, Game Theory,
Sustainability.

MY HOBBIES...

Books and movies.
Sports: football - in 2011/12 I played in a Youth National League -
tennis, cycling and skiing.

The future isn't made, it's engineered (a quote by someone at Imperial College)
