Address: Via Friuli 86, 20100, Milano, Italy (Work)

● ABOUT ME

Expert in social impact measurement and management, particularly in the context of public policies and public private partnerships. My research interests focus on Social Impact, Social Economy, Public Private Partnerships, Outcome based contract, Third Sector, and public and social policies particularly in the context of European Policies (e.g., Structural Funds, Cohesion Policies).

● EDUCATION AND TRAINING

PHD IN MANAGEMENT ENGINEERING Politecnico di Milano, Department of Management, Economics and Industrial Engineering

The thesis is a collection of three papers investigating the role of Social Impact Measurement (SIM) within Public-Private Partnership (PPPs). The overarching aim is to explore whether and how SIM can serve as a strategic infrastructure for enhancing the capacity of these contracts to generate social impact and public value.

● PUBLICATIONS

2024

[Exploring the functions and role of social impact measurement in enhancing the social value of public-private partnerships: A systematic literature review](#)

This systematic review investigates how social impact measurement (SIM) can enhance transparency and accountability in public-private partnerships (PPP). A range of impact measurement approaches are identified. Findings indicate that the most effective share the following characteristics: they embed SIM within a collaborative contract; they undertake measurement from the beginning and throughout the PPP; they are conducted by a trusted independent organisation.
